

National Municipal Benchmarking Survey Results for Calgary | June 2023

In an effort to better understand how Calgary compares to other large municipalities across Canada when it comes to certain performance measures and indicators, Corporate Research fielded surveys with residents in five cities: Vancouver, Calgary, Edmonton, Toronto, and Montreal.

Survey questions were fielded on Leger Marketing's national omnibus panel between June 12 and June 16, 2023.

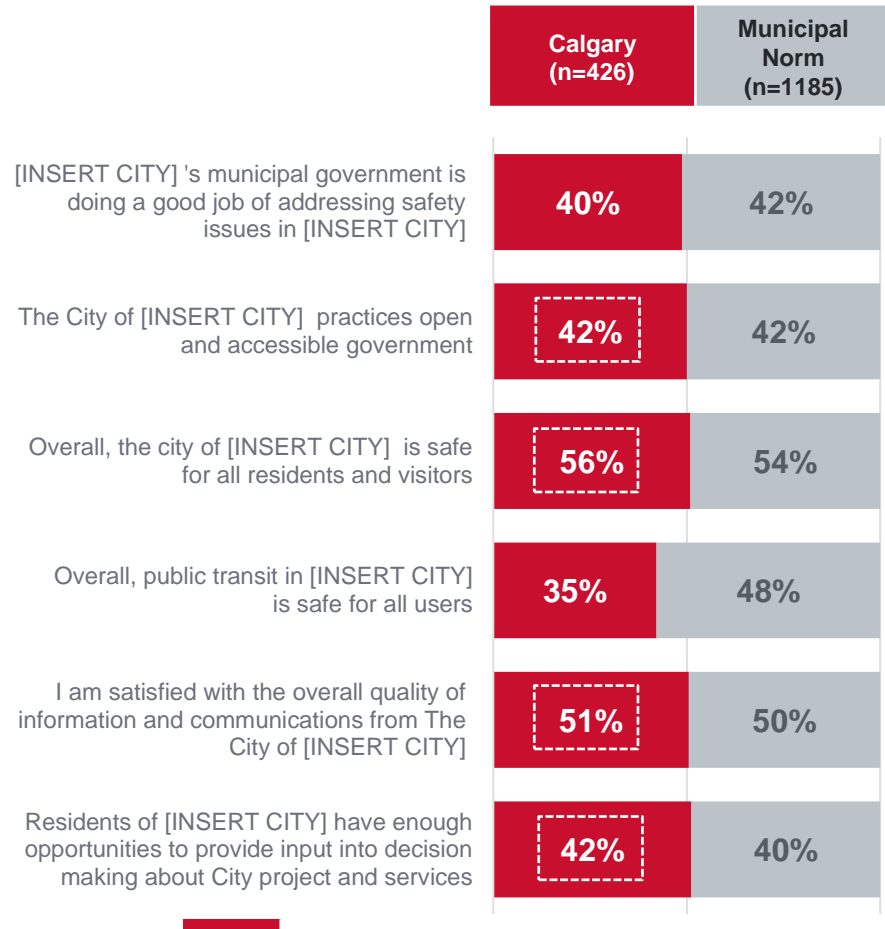

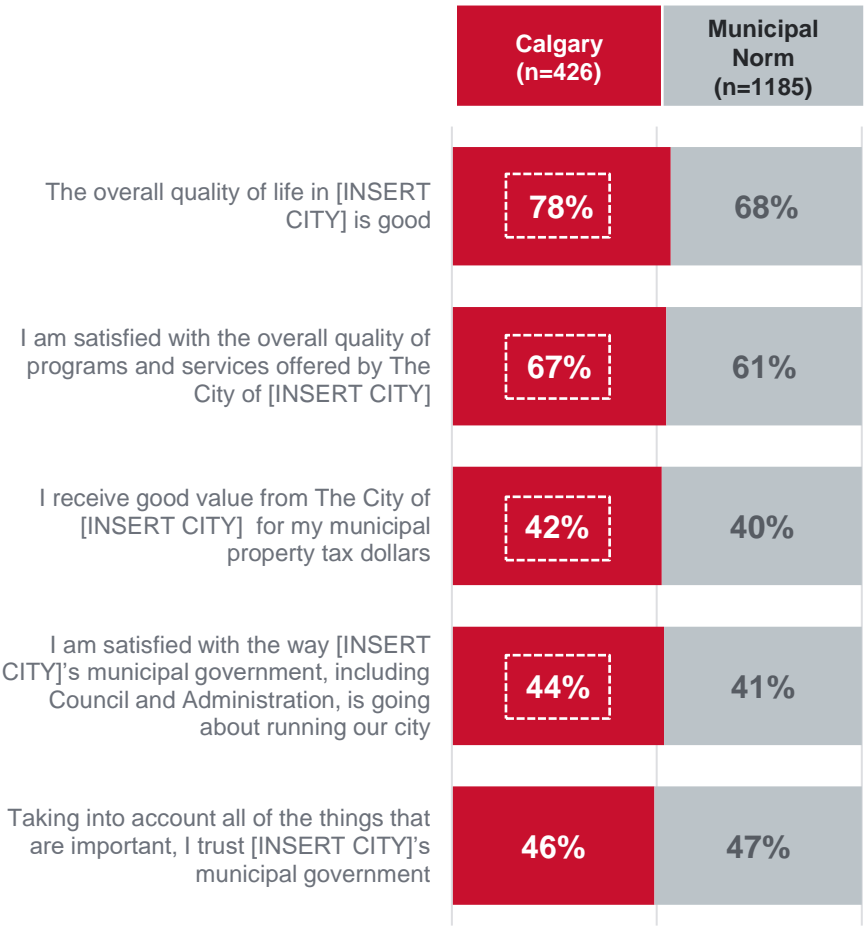

A national municipal norm was calculated for all cities to use as a benchmark to compare each city's results against. Although the survey sample size was n=500 for each city, this also included each Census Metropolitan Area (CMA). The size and populations of the CMA varies considerably from city to city. For the purposes of this report, only "city proper" results have been reported. To normalize comparisons as much as possible, sample sizes have been rebased to compensate for differences from city to city and allow for direct comparisons.

While Calgary scores on par or above on most measures it is strongest when it comes to perception of quality of life and satisfaction with the quality of programs and services. Conversely, Calgary is below norm for perception of safety on public transit.

National Municipal Benchmarking Survey Results for Calgary | June 2023

 Indicates on par with or above normative score.

Please note: Results shown for “city proper” and not CMA (census metropolitan area). Given differences in methodology, question design and scales, survey flow, field timing and other factors, results of this survey should not be directly compared to other surveys that ask similar questions.
