POLICE  
SERVICE

RESPECT • HONESTY • COMPASSION • COURAGE • FAIRNESS • ACCOUNTABILITY • INTEGRITY

## Executive Summary

The full picture of the socio-economic impacts brought on by the public health state of emergency under Covid 19 is evolving. However, the immediate and sudden changes to the social dynamic of society, including office closures, shutting of businesses, closures of public spaces, restrictions on gatherings, and sweeping travel restrictions have had a significant short-term impact on both crime and disorder. We know that with the link between crime and the economy, particularly unemployment, and the longer-term impact of the pandemic on crime and calls for service is yet to be realized.

The Calgary Police Service has been tracking the impact of the Covid-19 state of public health emergency on crime and disorder patterns in the city. Since the state of emergency was declared on March 15th 2020, general call and crime volumes have shown noteworthy reductions. Restrictions on gatherings, closures of public spaces and the large portion of the population being home-bound have increased guardianship in residential areas and reduced the opportunity for certain crimes, such as robberies, break and enters and thefts of and from vehicles. Overall calls for service also saw slight reductions; however, there was an increase in citizen's reports of disorderly behaviours and non-criminal domestic conflict.

### Violent Crime

By the end of 2020 violent crime had dropped 11% from 2019 but was 6% higher than the five-year average. It is interesting to note that early indications for violent activity in 2020, prior to Covid, were that volumes were on track with 2019 levels. The data shows that violent crime volumes were closely tied to the lockdown measures, showing significant drops in April and December during periods of greatest restriction. As the economy reopened in June, violence returned to average levels reaching 2019 levels by July. At its peak in August last year violent crime exceeded 2019. Threats to cause bodily harm or death and harassing communications increased notably during this time, with increases seen between non-familial relationships like business relationships, friends and strangers.

There were 34 homicides in 2020, a 28% increase from the average for this period. By rate of population this amounts to 2.6 homicides per 100,000 people. Five of the 34 homicides were domestic-motivated. Sexual assaults are at their lowest level in four years. A drop in the number of reported Level 1 (common) sexual assaults drove the overall reduction and account for just over three in five sexual assaults. There was a large increase in the reporting of 'Other' sex offences in 2020; as is typical for this type of offence, many of these were subject to late reporting and had occurred in previous years. Within this sub-group of offences, sexual interference with a child and non-consensual distribution of intimate images registered the biggest increases.

Assaults account for over 70% of all violent crimes, with Level 1 (common) assaults making up the majority all assaults. When compared to last year, common assaults are down, influenced heavily by public health movement restrictions. From April onwards common assaults show an 18% drop from 2019, returning to more average levels. More serious assaults, those with a weapon or causing bodily harm, are also down this year from recent years.

Robberies are crimes significantly impacted by the combination of closures of businesses and limited public movement. Between April and December financial robberies became nearly non-existent, with only two during that period, dropping from 22 for the same period in 2019. In 2020, the total number of robberies dropped by one-quarter from 2019; commercial robberies dropped by 28%, and person robberies by 16% from 2019 levels. These reductions were deeper when only the pandemic period is considered, as between April and December commercial robberies dropped 39%, person robberies and home invasion robberies by 30%.

## **Executive Summary (con't)**

### **Domestic Violence and Domestic Conflict \***

Fewer victims reported domestic violence than in 2019. Since April, reports of domestic violence have been 14% below the same period in 2019; reductions were driven largely by fewer reported Level 1 (common) assaults. There were, however, higher numbers of victims reporting more serious assaults and sexual violence. Domestic assaults involving a weapon or causing bodily harm increased. In 2020 reported domestic-related sex offences were down from those received in 2019 but were one-quarter higher than the five-year average.

Calls made to police for assistance or police presence for escalated domestic disputes that have not reached a criminal threshold increased sharply during the first three months of the state of emergency. These types of call came in throughout the remainder of 2020 at a significantly higher rate than in previous years.

### **Property Crime**

Property crime activity was suppressed under the state of public health emergency, remaining well below 2019 levels from April through the end of the year. Reductions were recorded in most categories, resulting in an overall reduction of 16% in 2020 from 2019, and a 6% decrease from the benchmark five-year average. When April through December are isolated, the reductions are steeper at 22% down from 2019, and 13% from the five-year average. Enhanced guardianship of property combined with a reduction of vehicles and property in public spaces are primary factors in these reductions. A return to more normal movement patterns, combined with economic pressures and high unemployment are expected to bring property crime volumes back up to pre-Covid levels.

When compared to 2019, break and enters are down 9%, driven down by a cumulative 25% reduction between April and December. During this pandemic-influenced period dwelling break and enters registered a 37% reduction and commercial break and enters dropped by one-third.

Thefts of and from vehicles account for more than half of all property crime. Vehicle thefts had been trending on a notable upward trajectory by the end of 2019, becoming one of the highest rates in the country. Since April, vehicle thefts dropped 32% from the same period in 2019, resulting in an overall decrease in 2020 of 34% when compared to 2019. Thefts from vehicles had previously been trending upwards throughout 2019 but by the end of 2020 these had reduced by 16%; the period from April to December drove this change with a 25% drop from the same period in 2019. Shoplifting volumes were driven downwards in 2020 as a large proportion of shops remained closed or reduced in capacity during periods of the year.

### **Disorder**

In addition to monitoring crime levels, the Calgary Police Service uses a range of incident types from publicly-generated calls for service to monitor levels of disorderly behaviour. These calls tend to be seasonal and increases during the warmer months are expected. The incident types selected for this disorder index are those which can have a negative impact on citizens' perceptions of safety, particularly in public places. Calls about suspicious persons, vehicles, unwanted guests, and disturbances make up the largest portion of complaints received about disorderly behaviours.

Elevated levels of disorder were noted throughout 2020. Increases in reports of unwanted guests, noise complaints, party complaints and reports of possible gunshots. Citizens with higher vigilance and potentially less tolerance for disorder, coupled with the shift to increased occupancy of residential areas, and redistributions of vulnerable populations under Covid-19 are contributors to additional reporting of disorder.

\*Note: Domestic violence is included in total violent crime in the city but is reported quarterly as a subset of all violent crime. As with all violent crime, domestic violence is represented at the victim level by the most serious offence against each victim in an incident.

## REPORT NOTES

Most of the statistical data in this report is derived from the Calgary Police Service records management system (SENTRY) and compiled by the Resource and Project Team/Bureau of Service & Community Support. Disorder data is derived from the Computer aided Dispatch (CAD) system.

Reporting is based on the most serious offence in the incident. Please note that offences are assigned to the month in which the offence was reported, which is not necessarily the month the offence occurred. The reported date is the first point in time at which the police were notified of the offence and reporting lag may vary due to circumstances (these are typically property crimes where the victim did not report the offence until a later date, or was unaware of the loss until a later date, or late-reported sexual assaults). Also note that “attempted” offences are included in these totals. Violent crime, excluding robbery, is counted by the number of victims, using the most serious offence against the victim. Robbery, and all other crime, is counted by incident using the most serious offence in the incident. Of note, cases are often cleared months and sometimes years later. Consequently, clearance rates for previous years may appear to be much higher than those of the present year. Cases “cleared by charge” and those “cleared otherwise” are included in these clearance rate totals.

For a more detailed explanation of the offence counting methodology, please contact the Resource and Project Team/Bureau of Service & Community Support.

<sup>1</sup> Violent crimes are counted at the victim level using the most serious violation against each victim in an incident. <sup>2</sup> Due to the dynamic nature of homicide investigations these numbers may have been updated manually to reflect the current homicide count. Due to manual updating, it's possible that 1 or more homicides may be reflected in the assault category. Homicide counts are provided by the homicide unit. <sup>3</sup> Robbery and all other crimes, as well as selected domestic non-criminal incidents, are counted at the incident level using the most serious offence in the incident. <sup>4</sup> Missing persons are counted by the number of missing individuals.

<sup>1</sup>Due to the dynamic nature of homicide investigations these numbers may have been updated manually to reflect the current homicide count. Due to manual updating, it's possible that 1 or more homicides may be reflected in the assault category. Homicide counts are provided by the homicide unit. <sup>2</sup>The range of average is calculated as 1 standard deviation above and 1 below the calculated average for the previous five year period.

NOTE: Disorder reported here includes only publicly generated calls. Dispatched, advised and callback calls are included.

<sup>1</sup>Calls for service included in the "mental health concern" component of social disorder are only those calls from the public which are specifically coded as a mental health concern or mental health warrant. It is important to recognize that any call police are asked to attend may involve some element of mental health concern, even though they are not coded as such. This applies particularly to calls about suicide, missing persons or check on welfare, which are not included in this data as they are not considered social disorder. <sup>2</sup>In June 2020 a change to event type coding resulted in the removal of Landlord/Tenant and Neighbour Dispute event subtypes. Calls to events involving these types of disputes are now coded according to the nature of the dispute rather than the relationship between the parties. Some may be represented in other event subtypes within Disorder such as Disturbance, Unwanted Guest, or Property Damage, while others may be coded as Keep the Peace or Assault and as a result would no longer be included in Disorder.

<sup>3</sup>The majority of Property Damage calls result in *Criminal Code* reports, which are counted under 'Other Property Crimes'. <sup>4</sup>The range of average is calculated as 1 standard deviation above and 1 below the calculated average for the previous five-year period. \*2019 data excludes December 31st due to technical issues.

<sup>1</sup>Violent crimes are counted at the victim level using the most serious violation against each victim in an incident. <sup>2</sup>Due to the dynamic nature of homicide investigations these numbers may have been updated manually to reflect the current homicide count. Due to manual updating, it's possible that 1 or more homicides may be reflected in the assault category. Homicide counts are provided by the homicide unit. <sup>3</sup>Robbery and all other crimes, as well as selected domestic non-criminal incidents, are counted at the incident level using the most serious offence in the incident. <sup>4</sup>A change made to the way in which bail violations and failures to appear/attend violations in 2017 makes the numbers for these categories non-comparable across the five-year period. <sup>5</sup>Missing persons are counted by the number of missing individuals.

<sup>1</sup> Violent crimes are counted at the victim level using the most serious violation against each victim in an incident. <sup>2</sup> Due to the dynamic nature of homicide investigations these numbers may have been updated manually to reflect the current homicide count. Due to manual updating, it's possible that 1 or more homicides may be reflected in the assault category. Homicide counts are provided by the homicide unit. <sup>3</sup> Robbery and all other crimes, as well as selected domestic non-criminal incidents, are counted at the incident level using the most serious offence in the incident. <sup>4</sup> Missing persons are counted by the number of missing individuals.
