INTRODUCTION:

The Bucket Brigade 2024 event involves activities which can be physically demanding and stressful. To minimize the health risk, participants and their parent(s)/legal guardian(s) are required to become informed of the nature of the work and, if needed, consult with a doctor to obtain an opinion on your child/ward's ability to participate in the program.

BUCKET BRIGADE PRACTICAL CURRICULUM:

There is an element of risk or injury inherent in the Bucket Brigade 2024 event. Participants will be put in physically demanding training activities. Participants will spend six hours, a combination of lecture and practical skills in various Firefighter areas, which may include, but is not limited to:

- Ropes and knots
- Confined space
- Hose evolutions

Examples of tasks in which participants may be required to complete:

- Carrying equipment up and down stairs in a building and around training grounds,
- Advancing charged hose lines,
- Working overhead with a pike pole or equipment,
- Tying ropes
- Crawling through Confined Space
- Lifting or dragging victims or dummies in an obstacle course

SUMMARY OF STRESSES:

This summary based on stresses that may be encountered by the Bucket Brigade 2024 participant. All Bucket Brigade 2024 participants' activities occur in a supervised and controlled environment. Tasks are broken down into manageable segments to avoid overloading the body. All tasks performed are voluntary and can be stopped if the participant wishes. All scenarios are done in a training atmosphere; therefore, activities can be stopped at any time if there appears to be any risk of injury or danger.

During practical activities, participants are required to wear "turn-out gear," which consists of firefighting pants and boots (approx. 6 kgs [13 lbs]) and a firefighting duty coat and fire helmet (approx. 4 kgs [9 lbs]).

The following is a list of factors that will increase the difficulty of the physical demands that are required during tasks:

1. Turn-out gear and equipment restrict movement and visibility, add weight to the individual and require an increased respiratory effort while wearing "turn-out gear."
2. The tools and firefighter equipment are often heavy and frequently used in awkward positions.
3. Environmental conditions (heat, cold, snow, wind, ice, rain, etc) can add difficulty to the tasks, which can cause significant fluctuations in body temperature.

If you have any questions or concerns about your child's/ward's ability to participate in this program, please consult with our staff in the Fire Cadet Office (403-510-7858), who can refer you to the occupational medical staff at the Fire Department Wellness Centre.

I have read and, understand the information contained in this form, and certify that my child/ward can complete the activities and tasks involved in the Bucket Brigade 2024 event as described above.
