

Community Outreach Assessment Tool

The City has created this optional assessment tool which is designed to help you navigate the decision to undertake outreach and provides guidance on high-level outreach considerations based on the impact of your proposed project and the community complexity.

When filling this out, it can be helpful to do some initial research into past projects in the area as this will help inform your answers for more accurate results. Also, ensure when you are answering these that you are putting yourself in the shoes of the community. Remember that how you answer today, is reflective of the context of today and isn't a guarantee that no issues will arise in the future as you move through your process.

| Outreach Approach Assessment | | | | | |
|------------------------------------|--|--|--|--|--|
| Direct approach (1A, 1B) | Your project is likely of low impact to the community and is not proposing a major change or disruption. For higher complexity, you may have to put a bit more effort in developing content to educate and inform The community about your project details. Consider choosing 2 - 3 tactics suited for a targeted audience*. | | | | |
| Moderate approach (2A, 3A) | Your project is of medium to high impact for the community, but is not very complex and likely little attention and/or issues are expected. Given the level of impact consider expanding your reach beyond the immediate neighbours to inform them of the project details and collect input if needed. Consider choosing 4 - 6 tactics for a range of targeted and broader audiences* | | | | |
| Comprehensive approach (2B, 3B) | Your project is of medium to high impact for the community, and of higher complexity. There are likely issues that will need to be mitigated and addressed and extra effort will be needed to educate and inform the community about your project. Consider a broader approach with the community and be open to an iterative process with multiple tactics where input could help inform better decisions*. | | | | |
