

Learning targets and curriculum connections

Program learning targets

Knowledge & Understanding Outcomes

Students will know/understand...

- Body language in cats and dogs
- How different situations affect cat and dog behaviour
- How human behaviour affects cat and dog behaviour

Skills & Procedures Outcomes

Students will be able to...

- Recognize body language cues in a variety of cat and dog breeds
- Respond appropriately to body language cues in cats and dogs
- Distinguish between appropriate and inappropriate human behaviours when interacting with cats and dogs

Scientific methods learning targets

Knowledge & Understanding Outcomes

Grade 5

- Phenomena that cannot be directly observed using the human senses can be observed and measured using technologies

Grade 6

- Hypotheses are proposed scientific explanations developed prior to conducting an investigation
- Evidence and scientific explanations are subject to further investigation to determine their validity
- Further investigation can involve a variety of processes, such as using new technologies and methods that reveal new evidence
- Explanations are used in science to answer scientific questions
- Scientific explanations are constructed using reliable, objective data and evidence

Skills & Procedures Outcomes

Grade 5

- Discuss technologies that provide scientists with evidence that cannot be directly observed using the human senses
