

Calgary

Municipal Benchmarking: **Calgary**

September 2024

In an effort to better understand how Calgary compares to other large municipalities across Canada when it comes to certain performance measures and indicators, Corporate Research fielded a series of questions in five cities: Vancouver, Calgary, Edmonton, Toronto, and Montreal. Questions were fielded on Leger Marketing's national omnibus panel survey between **August 30 and September 3, 2024**. Although the sample size was n=500 for each city, this also included each Census Metropolitan Area. The size and populations of these areas varies considerably. For the purposes of this report, only "city proper" results have been reported. In an effort to normalize comparisons as much as possible, sample sizes have been rebased to compensate for differences from city to city.

Questions posed in each city addressed quality of life, perception of value for taxes, satisfaction with programs and services, and others:

Please tell us the extent to which you agree or disagree with each of the following statements about The City of [INSERT CITY]?

Overall, my city is safe for all residents and visitors

Crime in my neighbourhood has increased in the last 3 years

My city's municipal government should do more in the fight against climate change

My city's municipal government delivers programs and services that remove barriers to participation for residents who need it the most.

The current economic situation in my city is good

My city's municipal government is taking appropriate measures to assist in my city's economic recovery

I am satisfied with the way my city's municipal government, including Council and Administration, is going about running our city.

The overall quality of life in my city is good

I am satisfied with the overall quality of programs and services offered by my city's municipal government

I receive good value from my city's municipal government for my municipal property tax dollars

I am satisfied with my city's programs and services aimed at helping residents reduce their environmental impact

Taking into account all of the things that are important, I trust my municipal government

Residents of my city have enough opportunities to provide input into decision-making about City project and services

I am satisfied with the overall quality of information and communications from my municipal government

My municipal government manages its spending in a responsible way that reflects the needs and priorities of all residents

My city is on track to be a better city 10 years from now

My municipal government practices open and accessible government

My municipal government fosters a city that is inclusive and accepting of all

I am satisfied with the overall quality of customer service provided by my municipal government

Municipal property taxes are the primary way to pay for services and programs provided by your municipal government. Due to the increased cost of maintaining current service levels and infrastructure, municipal governments must balance taxation and service delivery levels. To deal with this situation, which of the following four options would you most like your municipal government to pursue?

Increase taxes beyond current inflation rate - to expand services

Increase taxes at current inflation rate - to maintain services at current levels

Cut services - to maintain current tax level

Cut services further - to reduce taxes

Benchmarking Results: **Calgary** September 2024

Questions asked on Leger's national online omnibus survey in 5 cities between **August 30 and September 3, 2024**: Vancouver, Calgary, Edmonton, Toronto, and Montreal. **Calgary not included in overall Municipal Norm calculation below.**

Although the survey sample size was n=500 for each city, this also included each Census Metropolitan Area. The size and populations of these areas varies considerably from city to city. For the purposes of this report, only "city proper" results have been reported. In an effort to normalize comparisons as much as possible, sample sizes have been rebased to compensate for differences from city to city and allow for direct comparisons.
