RE: City of Calgary Prequalified Lists for Roads Streetlighting Consulting and Construction to Expire January 2026

Effective January 1, 2026 the list of engineering consulting firms prequalified for City of Calgary **Roads Streetlighting** ([Prequalification for engineering and architectural services](#)) and the list of contractors prequalified for City of Calgary **Streetlighting Construction** ([Prequalification for construction prime contractor](#)) will expire.

The prequalified categories related to Roads Streetlighting & Electrical will be replaced with the **Streetlighting Design Permit** and **Street Lighting Construction Permit** for engineering firms and contractors respectively.

Streetlighting Design and Streetlighting Construction Permits will be administered by the City of Calgary Streetlighting & Electrical department. Permits will be granted on a renewable annual basis at no cost. Permit holders will be qualified to bid on and perform work related to City of Calgary Streetlighting & Electrical infrastructure.

Applicants wishing to apply for a City of Calgary Street Lighting Design and/or Construction Permit need to complete the application requirements found under the heading *Street light bids* at [Street light resources for developers and consultants](#) and submit to streetlighting@calgary.ca accordingly.

Information and resources for the Streetlighting Design and Construction Permits, including technical standards and guidelines, can be found on this page [Street light resources for developers and consultants](#).
