

# Wall B

In this area, one possible location for a noise wall was explored. Because this noise wall would have to be constructed on private residential property and would only provide noise mitigation for the impacted properties, the impacted landowners are being engaged with directly and we will proceed according to their preferences.

**Legend**  
 — Wall location (B)

## Wall B - Approved Location

## Wall Height

2.4m to 4.4m

B

- **Constructability:** Wall option has few conflicts with utility lines. Slope of area makes construction of wall challenging.
- **Active Mode Connections:** Pedestrian access to stairway and pathway would likely need to be closed during construction.
- **Green Space:** Requires significant tree and vegetation removal to construct wall.
- **Safety:** Wall option would provide separation between Bow Trail ramp and adjacent properties.
